Part Number: S8023

*** Always disconnect the battery *before* attempting any electrical work on your vehicle. ***

WIRING INSTRUCTIONS

NOTE: THIS SENSOR IS NOT COMPATIBLE WITH GAUGES CURRENTLY USING A ONE WIRE WATER TEMPERATURE SENDER!

Note: Automotive circuit connectors are the preferred method of connecting wires. However, you may solder if you prefer.

Water – Blue – This is Two wire for water temp sender. This gauge is incompatible with other sending units, so you must replace the existing water temperature sending unit with the included sender and wire pigtail. These wires will be both be wired to dash panel.

Water –Black/ Blue -This is ground for water temp sender and must be wired to corresponding wire on dash. (ONLY if no Black/Blue on dash ground to engine block same as the dash unit.
